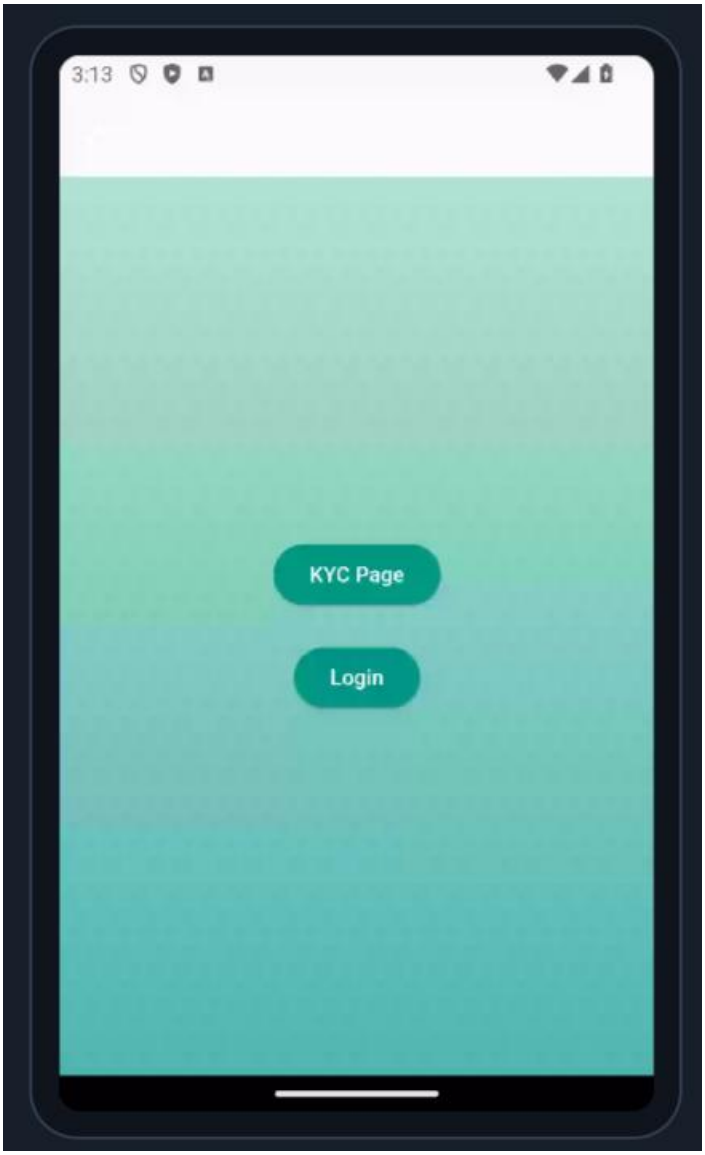
Flutter Application Pages Overview

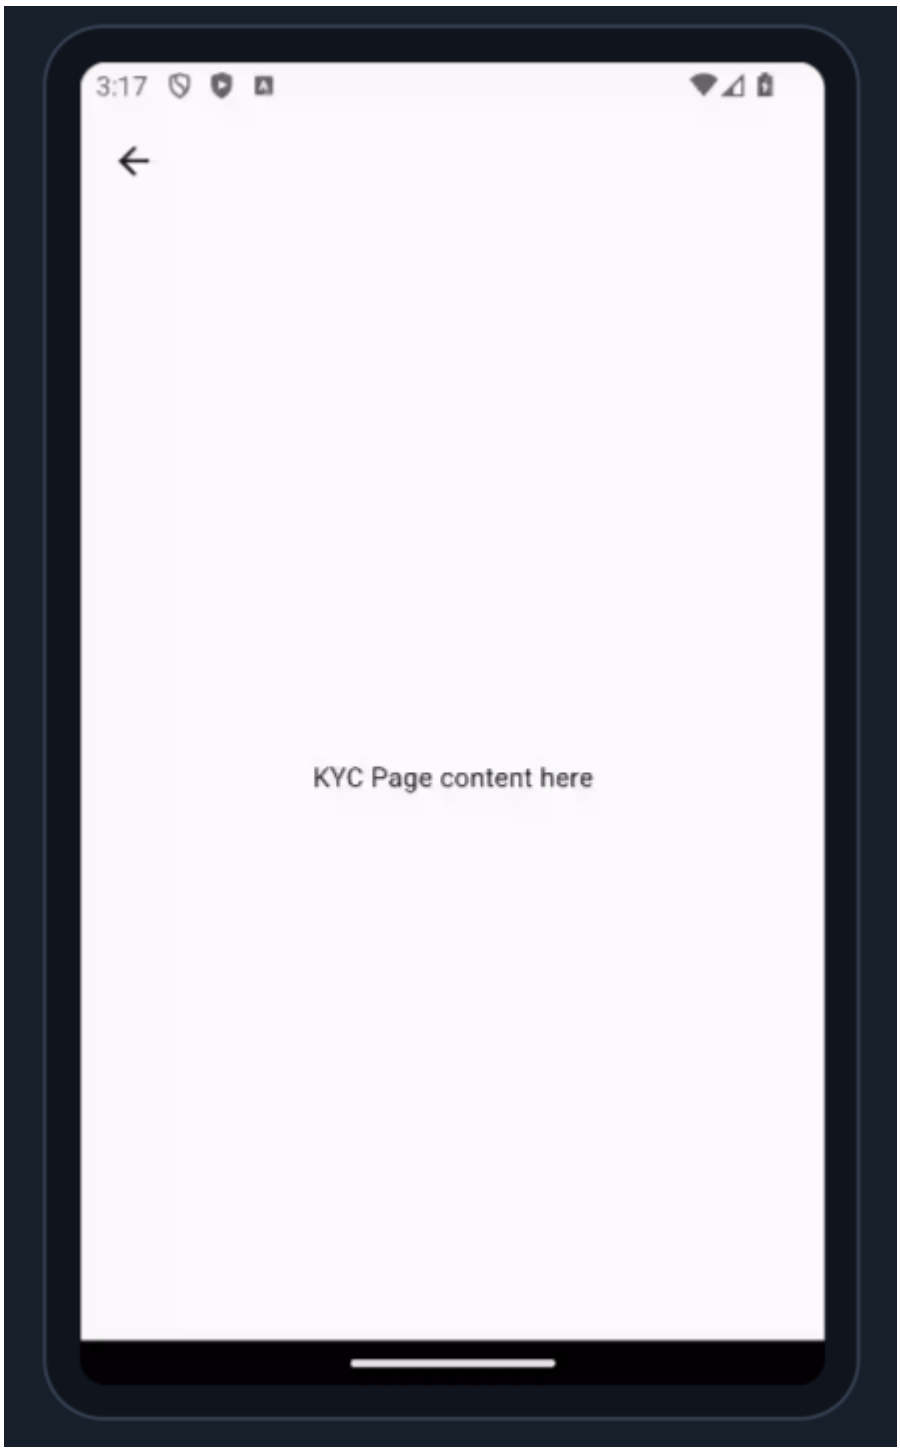
Welcome Page

The Welcome Page serves as the entry point for the application. It features a gradient background and two navigation buttons: one for the KYC Page and another for the Login Page.



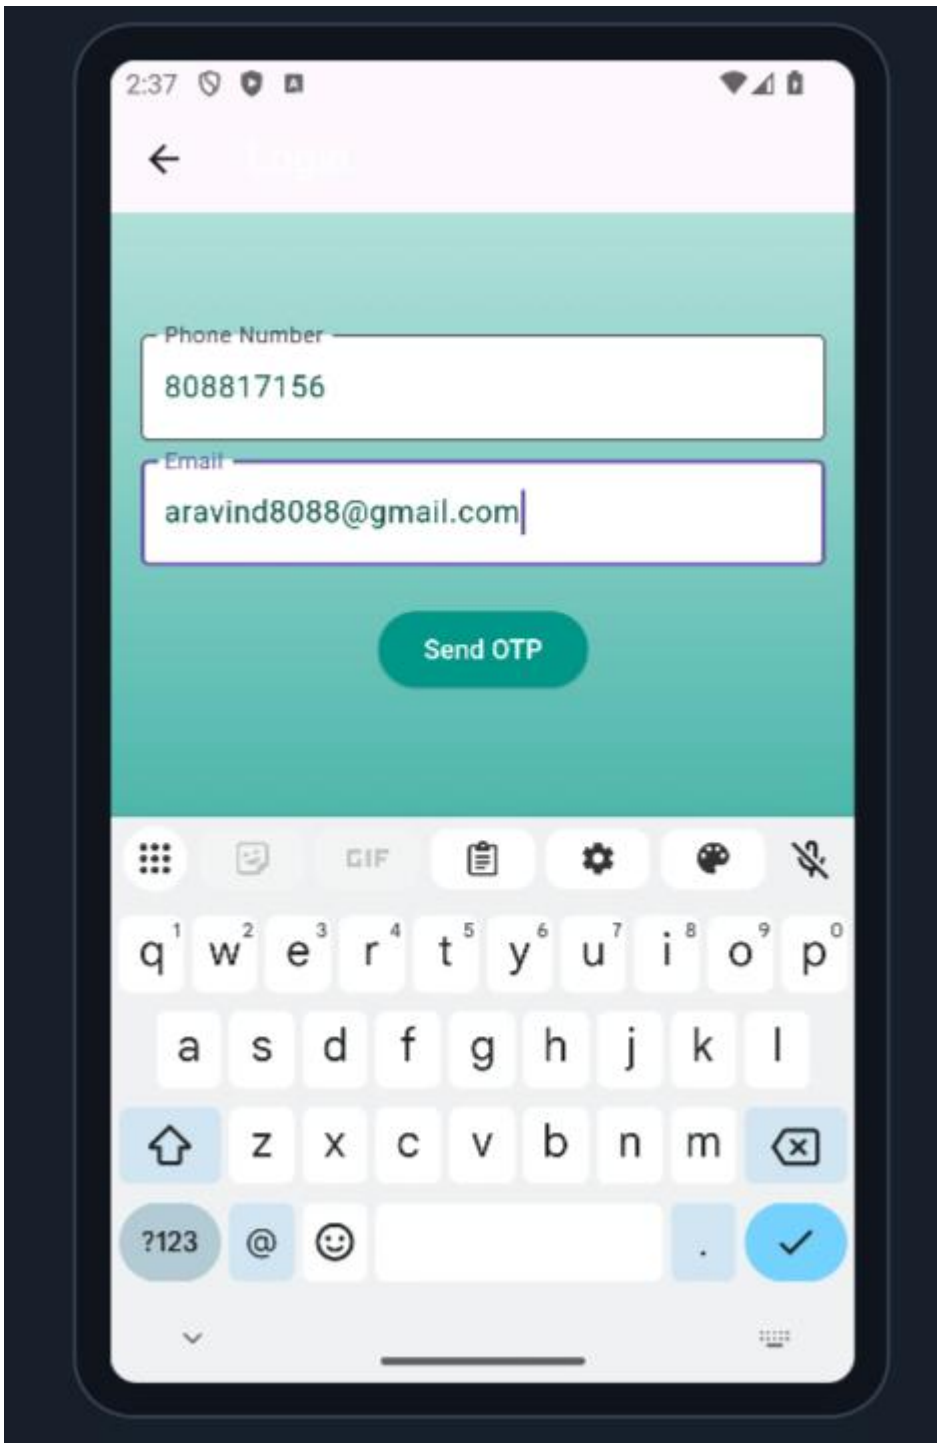
KYC Page

The KYC Page is designed for collecting user identity details as part of the Know Your Customer (KYC) process. This page is currently under development.



Login Page

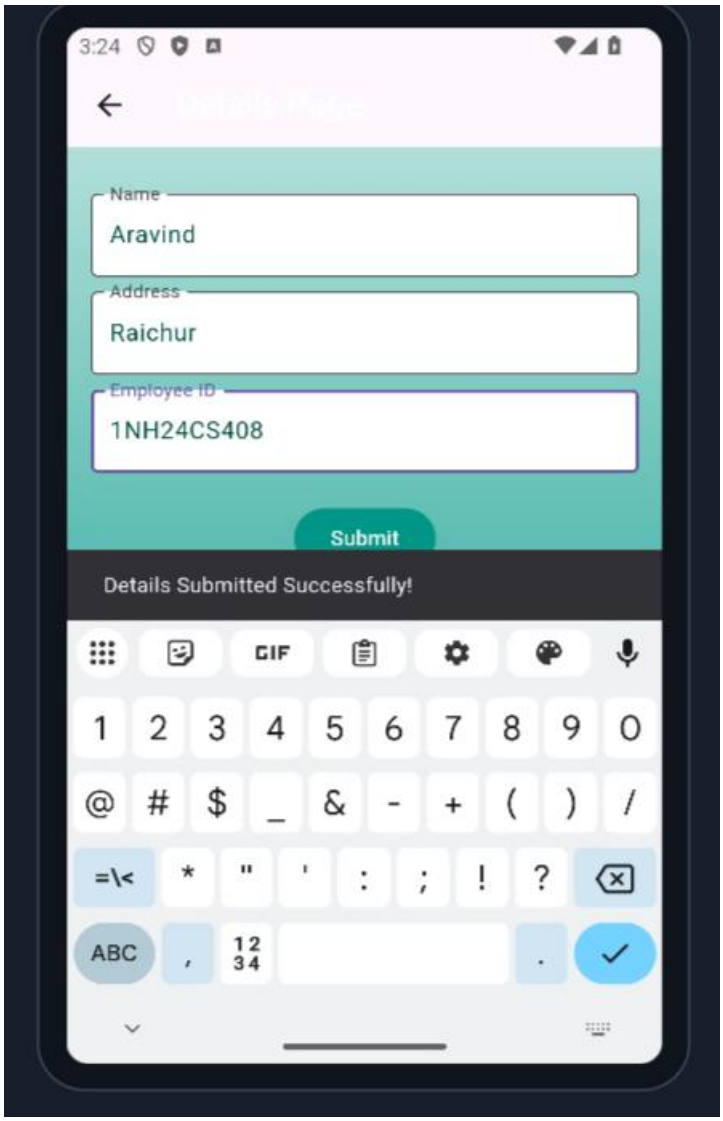
The Login Page allows users to input their phone number and email address. It includes text fields for data entry and a button to proceed to OTP verification.



OTP Page

The OTP Page facilitates secure verification by prompting the user to input a one-time password (OTP) sent to their registered phone number.

Details Page



The Details Page captures additional user information such as Name, Address, and Employee ID.

This data is essential for completing the user profile.
